• PARTICIPATION CONFIRMED

Alibaba Cloud x Atlas Agentic AI Hackathon

Hi Sum Kok Meng!

Welcome to the Alibaba Cloud x Atlas Agentic AI Hackathon! Your competition information and hackathon mailbox details are included below.

ENTRY TYPE	SHIP DATE	DELIVERABLE
Individual	30 Aug	3-Min Demo

PARTICIPANT

Sum Kok Meng

01 / PARTICIPATION GUIDE

Competition Rules & Demo Submission

Please review these rules before development and submission. You must submit your Demo through the designated form before the deadline.

CORE PROPOSITION

How will Agentic AI unlock new growth in the travel industry?

Start from any direction below, or propose your own ninth answer.

01 Hotels & Accommodations

Autonomous concierge, intelligent property management, dynamic pricing.

03 Attractions & Destinations

Context-aware discovery, crowd management, immersive AR navigation.

05 Payments & Fintech

Agentic commerce, instant checkout, B2B reconciliation, budget management.

07 AI Agent Ecosystem

Multi-agent orchestration, trust & verification, no-code build platforms.

02 Flights & Aviation

Proactive disruption handling, intelligent rebooking, multi-modal journeys.

04 Activities & Experiences

Self-organised itineraries, personalised matching, real-time cultural bridges.

06 Data & Analytics

Predictive travel intelligence, unified customer profiles, operational insight agents.

08 Other Travel Innovations

Generative content, sustainable travel, or your own answer for the industry.

-
- 01 Entry:** You are registered as an individual participant. All important updates will be sent directly to you.
-
- 02 Project:** Address a real travel industry challenge and deliver a working, demonstrable AI Agent prototype using Atlas data and capabilities, Alibaba Cloud infrastructure, and Qoder.
-
- 03 Submission:** You must submit a 3-minute product Demo video through the form below by 30 Aug 2026, 23:59 SGT (UTC+8).
-
- 04 Judging:** Innovation 30% · Feasibility 30% · Use of Qoder 20% · Demo 20%.

Demo deadline: 30 Aug 2026, 23:59 SGT (UTC+8)

02 / QODER ACCESS

Get Qoder and activate your account.

This hackathon mailbox is provided for you to receive the Qoder activation email. Please add it to Outlook, Apple Mail, or another email app that supports IMAP using the settings below, then monitor the inbox and complete the activation when the Qoder email arrives.

PARTICIPANT EMAIL ACCESS

Internal email account

aihackathon148@aihackthon.atriptech.com

Email password

zSkE3figxqW4G5IlPrPL

MAIL APP SETUP

Configure incoming and outgoing mail.

In Outlook, Apple Mail, or another email app that supports IMAP, choose to add an account manually. Enter the internal email account and password above, then use these server settings:

Incoming server · IMAPServer: aihackthon.atriptech.comPort: **993**SSL: **On****Outgoing server · SMTP**Server: aihackthon.atriptech.comPort: **465**SSL: **On**

GET STARTED WITH QODER

Download Qoder and start building.

After receiving the Qoder activation email in the hackathon mailbox above and completing the activation, install the Qoder desktop app and follow the Quick Start guide.

[Download Qoder →](#)[Read Quick Start →](#)**Access expiration notice**

The hackathon mailbox and related access will be **automatically deleted after October 7, 2026.**

03 / ATLAS INTEGRATION

Connect real travel capabilities to your Agent.

WHO'S POWERING THIS

Who is Atlas?

Atlas is the global travel tech platform and infrastructure behind the flight data in this hackathon — connecting **140+ airlines** to travel builders worldwide through a single API. As a partner of this hackathon, Atlas has opened up direct access to that same API and its travel data for participants to build against, so you can work with real routes, fares, and schedules instead of

mock data. The API capabilities are available through two paths: standard integration via ATRIP, or fast Agent integration via Atlas Skill.

ATLAS API

One airline capability layer, two integration paths

Choose the path that best fits your development workflow. Both paths use the Sandbox environment and support Agent prototypes for flight discovery, transactions, and servicing.

Fare search

Payment & ancillaries

Verify & book

Post-booking

PATH 01

AVAILABLE NOW

STANDARD PLATFORM INTEGRATION

Integrate via ATRIP

Register for ATRIP access, generate Sandbox credentials, and configure your requests using the API documentation.

1 Register and sign in to ATRIP

2 Generate Sandbox credentials

3 Configure and test with the docs

Register for ATRIP Access →

View API documentation

PATH 02

OPEN SOURCE

FAST AGENT INTEGRATION

Integrate via Atlas Skill

Atlas Skill is now open source. Visit the GitHub repository to add the Skill, follow the setup guide, and connect your Agent to Sandbox capabilities.

1 Open the GitHub repository

2 Follow the README to set up the Skill

3 Connect and start calling the Sandbox
